Experience

02.2025 – 06.2025	Research Assistant 40% <i>Eawag, Swiss Federal Institute of Aquatic Science and Technology</i> • Co-presented project work at the Winter School & Symposium 2025 of the Zurich-Basel Plant Science Center. • Contributed to the development of a Python-based image classification pipeline for plankton species using Python.
09.2024 – 02.2025	Civilian Service <i>Eawag, Swiss Federal Institute of Aquatic Science and Technology</i> • Contributed to the development of a Python-based image classification pipeline, including documentation and Bash-based work on ETH's SLURM cluster. • Optimized and standardized code repositories and CI pipelines to improve reliability and maintainability. • Assisted in the preparation and co-design of workshop exercises for the Winter School & Symposium 2025.
07.2023 – 09.2024	Junior Data Scientist <i>Eniwa AG</i> • Improved and monitored data quality to maintain data integrity from source systems with SQL and Power BI. • Designed and implemented machine learning pipelines with Python on Azure, establishing end-to-end data flows from source to dashboard with CI/CD. • Collaborated with stakeholders to identify reporting needs and develop Power BI dashboards aligned with business goals.

Education

09.2022 – Today	BSc Data Science Expected graduation: 06.2026 <i>School of Computer Science FHNW</i>
06.2025 – 06.2025	Summer School in Bayesian Methods for Environmental Modelling <i>Eawag</i>
08.2017 – 07.2021	Electronics Technician EFZ with Vocational Baccalaureate <i>libs & FHNW, Institute for Automation</i>
